

CASTELLATED

Product Datasheet

The castellated system provides a quick, flexible and effective form of heating within a screeded floor build up, as well as minimising the height of the overall floor construction.

The panel is a moulded plastic panel, with an overall depth of 20mm - the 'castles' are spaced at 50mm intervals provide a consistent fixing point and enabling a fast and neat pipework installation. Panels can either be supplied plain, or with an EPS insulation backing.
