

STANDARD PROGRAMMABLE THERMOSTAT

The standard programmable thermostat is both a simple digital and programmable digital smart thermostat directly controlled using five tactile easy push buttons along the bottom front face.

Defaulting to a weekly programming mode, to select simple digital mode, in programming mode simply select option to disable, making this easier to users who have no need of timed on and off sequences. Slimline styling at only 14mm back to front depth. The large display face offers an easy to read screen.

A mains powered low energy thermostat, using less than 1 Watt of power to operate, costing less than conventional thermostats to operate.

Comes with a 5 year guarantee from date of install.

Product Codes:
HOR/PRT-230/W: STANDARD STAT

5 YEAR GUARANTEE
