eUFH

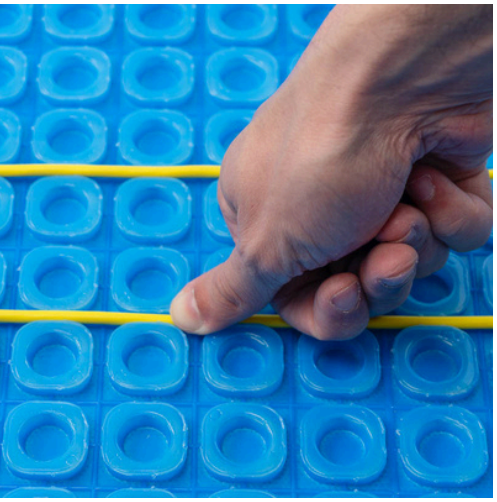

MEMBRANE HEATING CABLE

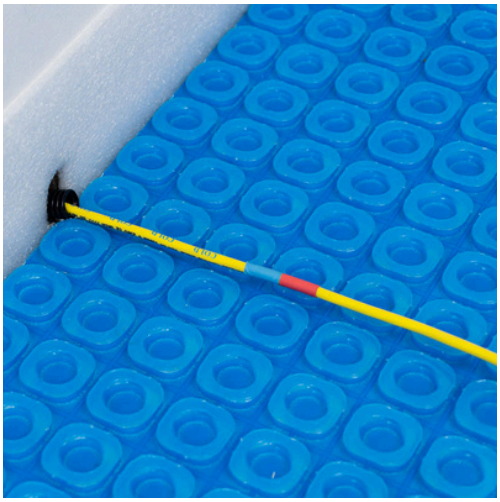

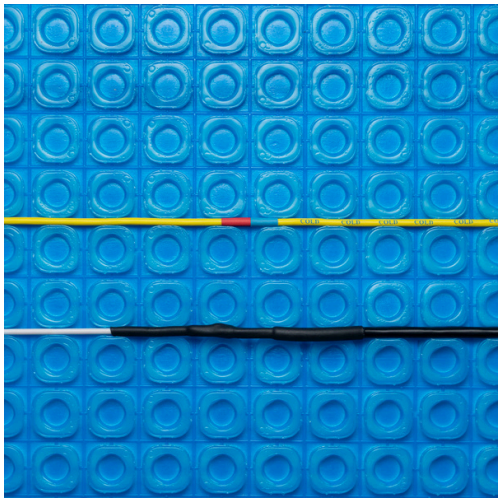

This heating cable is quick and easy to install, plus it's the most reliable UFH cable. It combines a TwistedTwin cable, and in-line joint technology. This removes risk of damaging the cable during installation, as cutting into the membrane and substrate is no longer required.

- Compatible with all decoupling membrane mats.
- No bulky hot/cold joint that needs cutting into the floor.
- Install into HORSTAD membrane or self-adhesive membrane at either 130W/m² or 195W/m²

LIFETIME GUARANTEE
